

## What makes us different?

Our facility is large enough to accommodate 32 children plus staff members. The style and layout of our unique home-like facility provides comfort and security to your child. Your child will be in the hands of our skilled instructors who have a tender heart for every child. Your child will begin to view learning as simply a pastime, not a chore. Surrounded by the comforts of home, your child will be free to explore individual interests, while being kept motivated and focused in the classroom.

We are excited to be able to teach your child during these tender years of learning. We acknowledge that every teacher uses a unique teaching strategy, which is why we believe that working closely with you will give us precise direction on how to effectively teach your child. All instruction is geared towards your child experiencing learning in an adventurous and exciting way.

## Safety First

While your child is busy learning, playing, singing, and growing, you can take comfort in our commitment to providing a safe environment everyday. We have developed and implemented the highest standards of safety and security, guided by our rigorous Health and Safety Policies and Procedures. Here are the many ways we protect your child:

**Health Practices:** Our staff is properly trained on medical emergencies, CPR, food handling, restroom safety, frequent hand washing (sometimes sanitizer is just not enough!), protective gloves, blood-borne pathogens, special health concerns, and other common practices.

**Emergency Preparedness:** We practice fire, tornado, and emergency evacuation drills. Just in case!

**Playing it Safe:** While your child is enjoying the outdoors, climbing, sliding, and exploring, our teachers and staff never stop working to ensure your child's safety on our playgrounds. Our fenced play area provides lots of activities as well as plenty of shade.

**Allergies:** We make sure our staff is well educated about your child's allergies. Although we would love for our facility to be 100% peanut free, we are unable to implement that request at this time. Because our students may bring their lunch from home, peanut products may be in their possession. We will try to monitor what each child brings in and make provisions to secure our students with allergies.

Please know that Bright Eyes Kindergarten will provide alternatives for your child during snack and lunch time in case of food allergies.
